PROJECTS / OPEN-SOURCE

Home Books | Link

HTML, CSS, REACT JS, NODE JS, REST API

An unique online platform that enables smooth communication between schools and students. This project revolutionises textbook purchasing by offering low prices, real-time delivery monitoring, and school-specific book lists. The initiative considerably improves the accessibility of instructional resources, resulting in a more streamlined and efficient experience for students and administrators.

Bark Buddies | Link

REACTJS, NODEJS, FIREBASE, TAILWIND CSS

The goal is to provide a user-friendly and dependable internet platform that connects dog owners, breeders, and adopters. The platform will have complete dog profiles, search filters, and educational tools to assist users in making informed decisions. It intends to overcome the present lack of comprehensive features and reliable contact information, hence improving search efficiency and effectiveness.

Farmers Website | Link

HTML, CSS, JAVASCRIPT, JQUERY

A website that addresses real-world challenges encountered by farmers owing to a lack of understanding. To address this issue, we developed a solution that provides information about government initiatives and current weather in a specific area, sourced from an open weather API.
