SKILLS

Programming Languages:	HTML, CSS, JAVASCRIPT, REACT JS, PYTHON, C++
Libraries/Frameworks:	REACT JS, BOOTSTRAP, TAILWIND
Tools / Platforms:	NODE JS, FIREBASE, CODECHEF, POSTMAN, GIT, GITHUB
Databases:	ORACLE SQL, FIREBASE, MONGO DB

PROJECTS / OPEN-SOURCE

Bark Buddies | Link   *REACTJS, NODEJS, FIREBASE, TAILWIND CSS*

The goal is to provide a user-friendly and dependable internet platform that connects dog owners, breeders, and adopters. The platform will have complete dog profiles, search filters, and educational tools to assist users in making informed decisions. It intends to overcome the present lack of comprehensive features and reliable contact information, hence improving search efficiency and effectiveness.

Home Books | Link   *HTML, CSS, REACT JS, JAVASCRIPT, NODE JS, REST API*

An unique online platform that enables smooth communication between schools and students. This project revolutionises textbook purchasing by offering low prices, real-time delivery monitoring, and school-specific book lists. The initiative considerably improves the accessibility of instructional resources, resulting in a more streamlined and efficient experience for students and administrators.

Farmers Website | Link   *HTML, CSS, JAVASCRIPT, JQUERY*

A website that addresses real-world challenges encountered by farmers owing to a lack of understanding. To address this issue, we developed a solution that provides information about government initiatives and current weather in a specific area, sourced from an open weather API.
